2. Express the content of each passage in one sentence and explain the terms in bold typed. (i) At a time when there is a demand for greater transparency and accountability in administration, the courts stand out as open and public institutions. Another feature of due process is the right of every party to be heard. No decision can be taken affecting a person unless he or she has been given a fair opportunity to present his or her side of the story. (ii) The ageing population and life expectancy increase gradually. As a result of this the associated financial burden is not expected to subside over the medium term. This demographic transition underscores the need for the development of savings and pension products to cater to the requirements of this rising share of the population that is reaching retirement age.	(ii) The ageing population and life expectancy increase gradually. As a result of this the associated financial burden is not expected to subside over the medium term. This demographic transition underscores the need for the development of savings and pension products to cater to the requirements of this rising share of the population that is reaching retirement age. 3. Read the following text and summarize it into one third of its word number and give a suitable title. Indicate the numbers of words used at the end of summary.

Marking a significant milestone in the development of Sri Lanka's ICT industry, the government and Google Inc. signed and agreement to initiate the 'Google Loon project' in July 2015, which will cover the entire island with fourth generation internet. The successful implementation of this project, which is currently at the testing stage, will provide Sri Lanka with universal internet access, and is expected to enhance accessibility to high-speed, affordable internet across the island. Further, this will reduce the network infrastructure cost of domestic internet service providers, enabling the provision of low cost internet access. Moreover, this will open up the industry for competition based on innovation and service delivery, as service providers are likely to focus more on new business models with high value addition such as end to end solutions and further improvements in mobile payments technology, Universal internal access would significantly enhance financial inclusion, while enabling increased social-economic integration. In addition it will lead to the evolution of e-learning solutions facilitating improved access to education opportunities for underprivileged communities. Further, the project will facilitate the expansion of Information Technology Enabled Service such as Business Process Outsourcing and Knowledge Process

AND THE PROPERTY OF THE PROPER)
Outsourcing around the country. Meanwhile Telecom operators continued their efforts to	
promote active usage of ICT services in economic activities through several applications	ı
such as mLearning. Near Field Communication service, mobile and e-banking, mobile points

Part II - Case Study

4. Read the following case/incident and answer the given questions in relation to it.

Mr. Jeevananda is a lecturer at the Arunalu National College of Education. The task assigned to Mr. Jeevananda was to supervise ten teacher students assigned to schools under the internship training and to prepare evaluation reports relating to their professional abilities and to submit them to the President. Since the documents necessary in relation to this has been sent by the College of Education Office to the principals of these schools, Mr. Jeevanda advised the teacher students under his supervision to go to the relevant schools and start the teaching process.

Accordingly, Mr. Karunadasa a teacher student following a Mathematics course went on the due date to the Kotipola Maha Vidyalaya to which he was assigned and met the Principal and asked for advise to start work. By that time the teacher who was teaching Mathematics to Garde 11 has been transferred without a replacement, the Principal assigned Mr. Karunadasa to teach mathematics to these classes. The principal rejected the plea of Mr. Karunadasa that he be given another class, since it is a difficult task for a new teacher like him to teach a subject like Mathematics to a class of students who are to sit a public examination. The Principal insisted that an experienced teacher teaching Advance Level Mathematics will be appointed as his mentor and to engage in teaching getting advice from him. Therefore Mr. Karunadasa had to accept that class with reluctance.

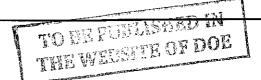

While teaching for about a week Mr. Karunadasa realised that the students were not satisfied with him. The following week when Mr. Jeevananda came for the first time to this school he pleaded with him to explain to the Principal the problem he has faced with and to give him another class. Accordingly, Mr. Jeevananda met the Principal and discussed with him, but the Principal was reluctant to change his stance. When inquired the mentor told Mr. Jeevananda that he is prepared to help as much as possible the teacher student, but he has to act invariably according to the advice of the principal.

(i)	Explain what actions Mr. Jevananda could take to resolve this problem.
	(10 marks)

(ii)	
	State what factors should be taken into account when organising internship training programmes for students of Colleges of Education.
	,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,
	······································
	(10 marks)
(iii)	State your observations regarding the stance of the Principal of Kotipola Maha Vidyalaya in this incident.
